

Haas Park Advisory Council
List of concerns/ideas for Field House project
October 2010

1. Projected construction timeline

We are often asked this question by neighbors and park patrons and would like to give accurate and current info

2. Current PBC site plan

We would like a better understanding (measurements) of the area that will be available for “passive” space between the field house and playground

3. Lighting

- a. Playground
- b. New athletic (West) field
- c. Passive area- between field house and playground

4. Athletic field

The condition of the new field has quickly deteriorated to “very poor”. What are our options to either?

- a. Improve the condition of the current natural surface and have a better plan and means of maintaining it
- b. Artificial sport surface

5. West face of athletic field

Currently the fence line does not continue from the alley to the street leaving a building exposed to the park. Park patrons often use the building to kick, hit or through balls against. While to date the owner has been very accepting, we feel this could be an issue in the future.

6. Move west field access gate

The current position of the gate does not allow it access from the alley of enough area to turn a vehicle. If moved further west, access will be available from the north/south alley between California and Fairfield

7. Medallions and keystones

Status of the medallions and keystones rescued from the old building. Discuss ideas and options to incorporate them in the new building or outside areas.

8. Sewer/Buffalo box in athletic field

Currently the box is protruding in our west field and presents an obvious danger. Also, we would like to have another water access point in/or west of the playground for garden/beautification projects
